

## 1. Initial landmark evidence

Target heatmap (peaked)  
Predicted heatmap (broader)

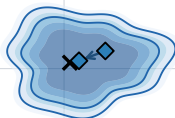

## 2. Introduce anatomical context

Unknown ground truth  
anatomical context

Atlas-initialized,  
landmark-adjusted context

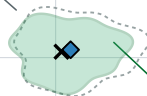

## 3. Context-guided landmark update

Updated predicted landmark  
using an attention mechanism

## 4. Landmark-guided context update

Previous context

Updated context conditioned  
on the refined landmark

✕ Ground-truth landmark  
◆ Predicted landmark

-- Unknown ground-truth context  
— Predicted anatomical context
